## Exchange-Calendar in Thunderbird

Official support is not given, neither by Mozilla nor Microsoft.

Nevertheless, there is an (almost) stable project which is offering calendar support for Thunderbird over a xpi-Plugin:

<https://github.com/Exchange-EWS-Provider/exchange-ews-provider>

Stable for *reading* Exchange Calendar entries. It is also possible to add/update entries, but it seems

like it takes some time that all data is synchronized properly.
