Exchange-Calendar in Thunderbird

Official support is not given, neither by Mozilla nor Microsoft.

Nevertheless, there is an (almost) stable project which is offering calendar support for Thunderbird over a xpi-Plugin:

[Exchange EWS Provider v3.5.0 stable / v3.6.0 Beta1](#)

Stable for *reading* Exchange Calendar entries. It is also possible to add/update entries, but it seems

like it takes some time that all data is synchronized properly.
