2025/11/23 01:43 1/2 Personal Storage

Personal Storage

for data exchange you can use FileSharing.

ZID Storage

Linux (zid-gpl)

You can access the ZID Linux Homedirectories via ssh and scp.

Hostname: zid-gpl.uibk.ac.at

User: c703nnnn

You can also directly access the AFS directories via Kerberos and OpenAFS: http://www.uibk.ac.at/zid/systeme/linux/extafs.html

Windows (nethome, netuser)

There is a personal "ZID home directory" which every person gets automatically; no other user has access to it.

Within the UIBK network, you can attach it directly to your Windows explorer via "Map network drive":

- Select **I:** as drive letter (if available; though, it will also work with an arbitrary available drive letter except A: and B:)
- For the folder, enter \\nethome.uibk.ac.at\~
- After that, enter your credentials in the following format for the user: uibk\c703nnnn

You can also access the ZID Windows home directory and the department c703 directory ("I: and J:") via sftp (also outside the UIBK network).

To access your data you need an sftp-client (e.g. winscp):

Hostname: netsftp.uibk.ac.at

User: c703nnnn

IFI Storage

at the moment not available.

Group Storage

Please ask your groups system administrator!
