

# Thunderbird Setup

## Mail

Add a new account

Click on *Skip this and use my existing email*

**Mail Account Setup** [X]

Your name:  Your name, as shown to others

Email address:

Password:

Remember password

Fill in these spaces:

Description	What to fill in	Notes
Your Name	First and last name, e.g. John Doe	use ue instead of ü etc.
Email address	Your official University Email address, eg. John.Doe@uibk.ac.at	can be taken from your "Benutzerbewilligung"
Password	can be taken from your "Benutzerbewilligung"	

Press *continue*

Thunderbird is trying to find the right settings but it will not find them, so immediately click *manual config*

**Mail Account Setup** ✕

Your name:  Your name, as shown to others

Email address:

Password:

Remember password

	Server hostname	Port	SSL	Authentication
Incoming:	IMAP <input type="text" value="138.232.65.244"/>	1143 <input type="text"/>	SSL/TLS <input type="text"/>	Normal password <input type="text"/>
Outgoing:	SMTP <input type="text" value="138.232.65.244"/>	1025 <input type="text"/>	SSL/TLS <input type="text"/>	Normal password <input type="text"/>

Username: Incoming:       Outgoing:

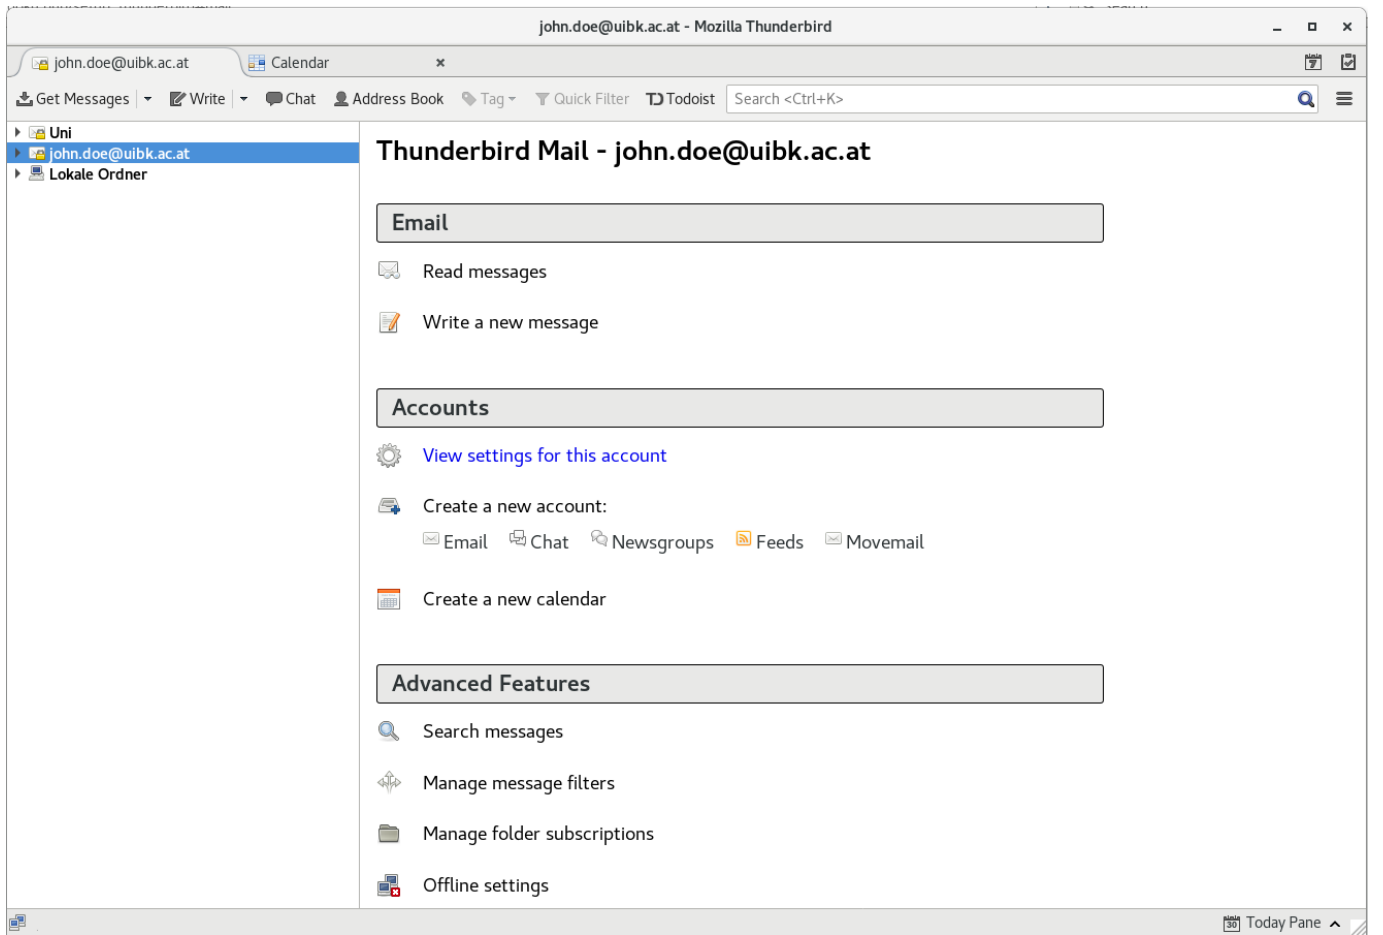

Once again fill these spaces:

Description	What to fill in	Notes
Username	Your c number	can be taken from your "Benutzerbewilligung"
Server hostname	138.232.65.244	incoming and outgoing are identical
Port (IMAP)	1143	
Port (SMTP)	1025	
SSL	SSL/TLS	
Authentication	Normal password	

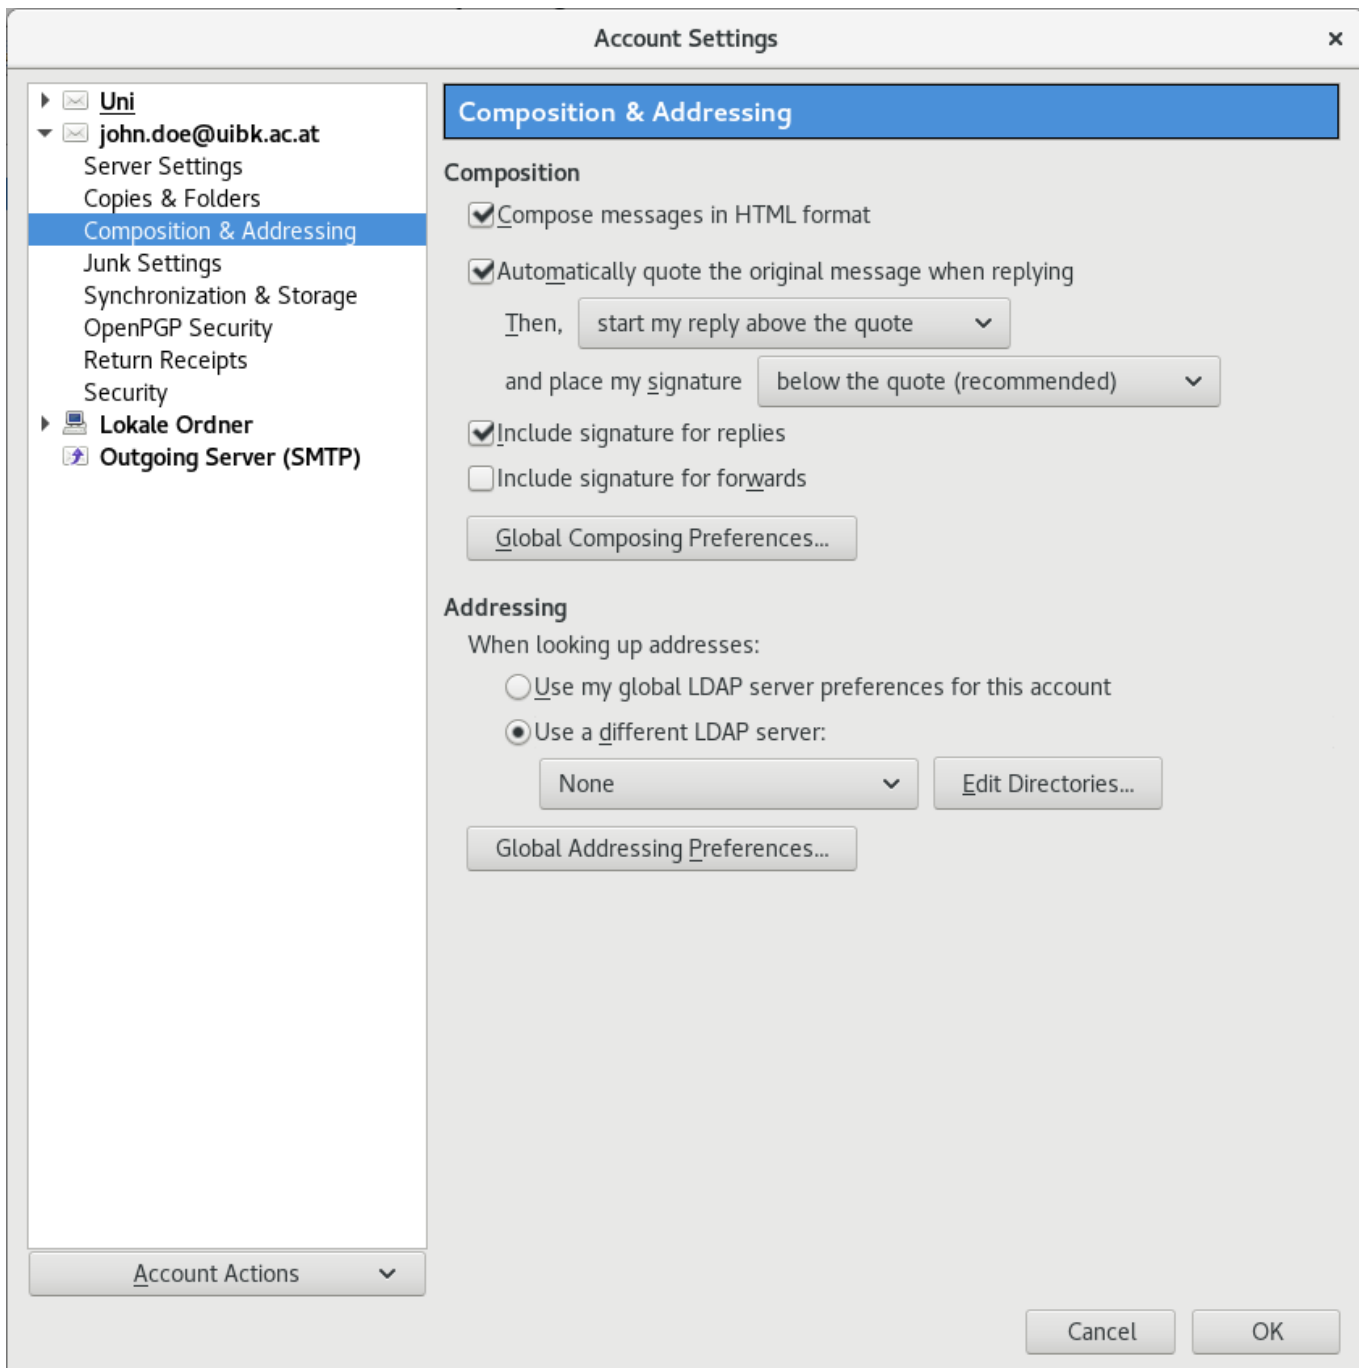

Double check your entered infos, and click *Done*

Your Mail Address is now configured.

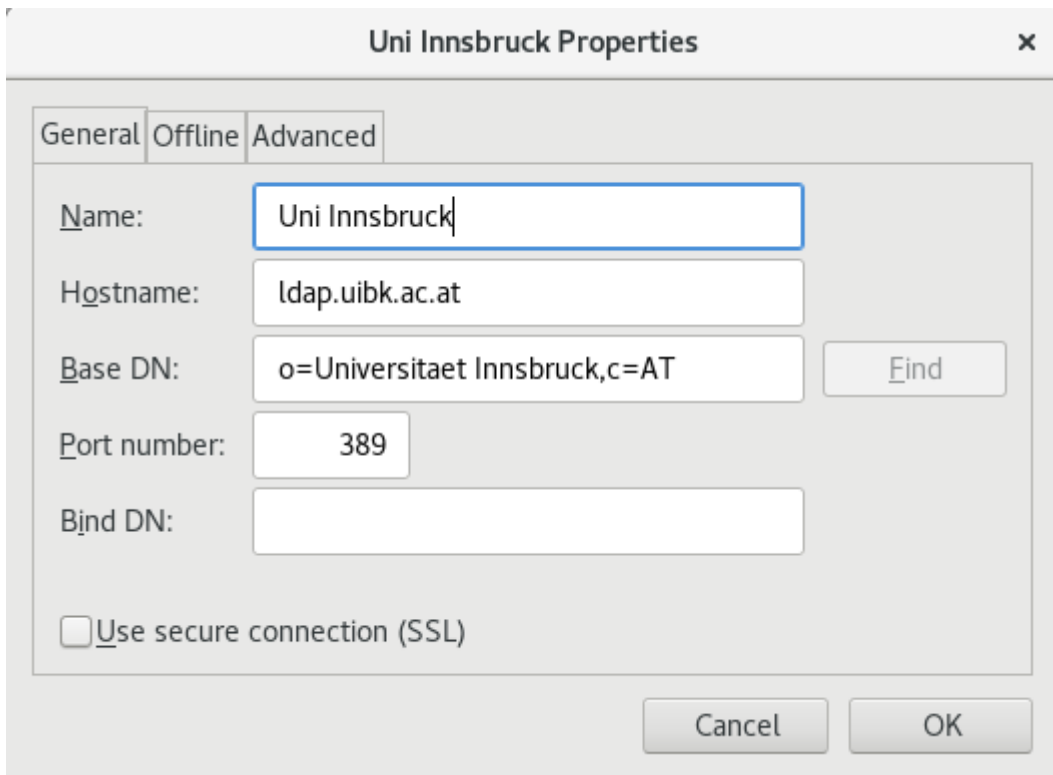

## LDAP

Click on *View settings for this account*

Under *Composition & Addressing* click *Edit Directories...*

Fill the spaces:

Description	What to fill in	Notes
Name	Uni Innsbruck	
Hostname	ldap.uibk.ac.at	
Base DN	o=Universitaet Innsbruck,c=AT	
Port Number	389	

## Email Signatur

To Add Text in your Signatur follow steps:

- 1- open your Thunderbird Prgoramm.
- 2- In navigation navbar click to **Edit** → **Accounts Settings** → **Signatur Text Input**

**Example Signatur:**

Reply-to Address: Recipients will reply to this other address

Organization:

Signature text:  Use HTML (e.g., <b>bold</b>)

University of Innsbruck  
Institute/Organisational Structure

Title First name Lastname  
Field of activity (e.g. Secretary)

Street address, Room no. xxx, 6020 Innsbruck, Austria

mobile +43 676 8725 xxxxx  
phone +43 512 507-xxxxx  
fax +43 512 507-xxxxx  
e-mail firstname.lastname@uibk.ac.at

Attach the signature from a file instead (text, HTML, or image):

Attach my vCard to messages

Choose... Edit Card...

## Calendar

Switch to the Calendar tab, right-click below the calendars on the left and select *New Calendar...*

**Create New Calendar** [X]

Create a new calendar

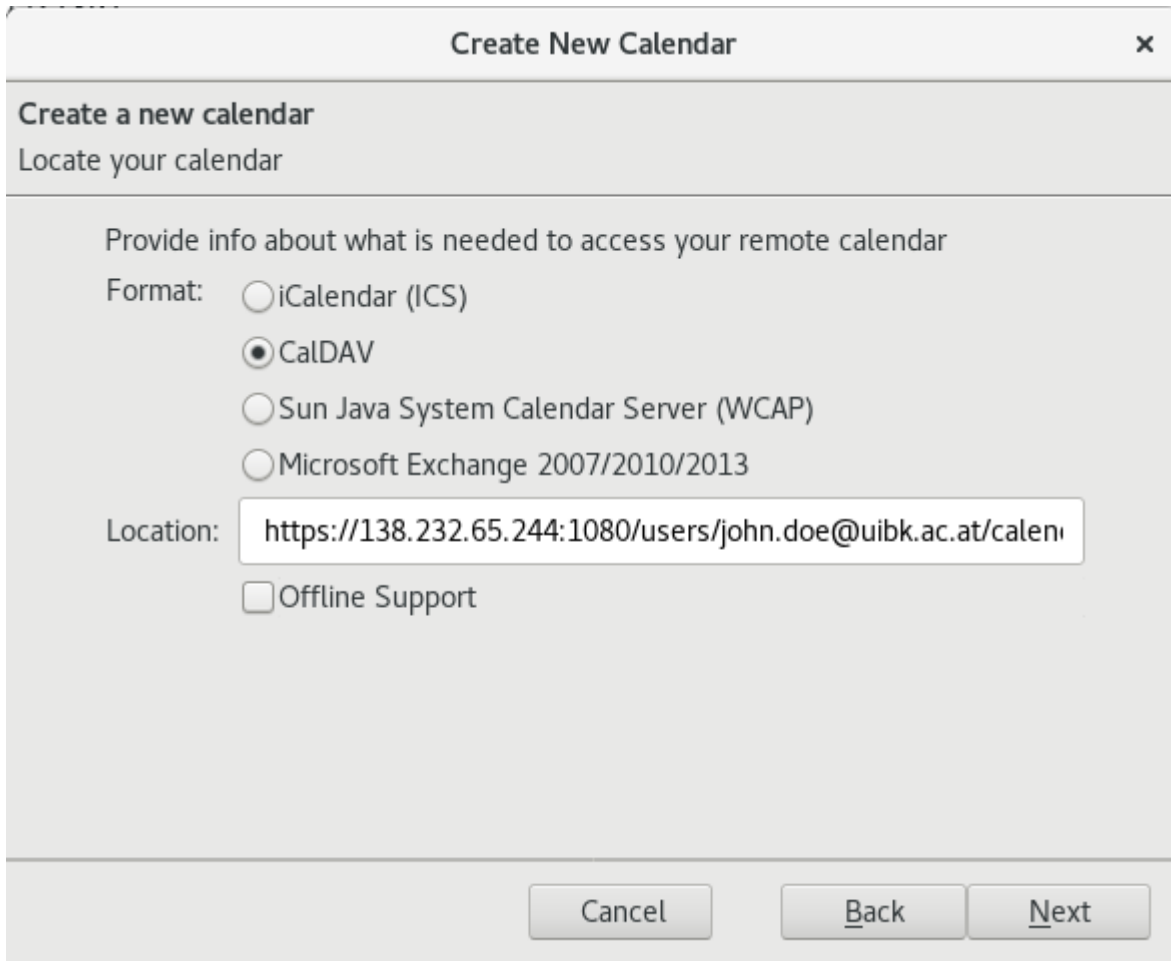

Locate your calendar

Your calendar can be stored on your computer or be stored on a server in order to access it remotely or share it with your friends or co-workers.

On My Computer

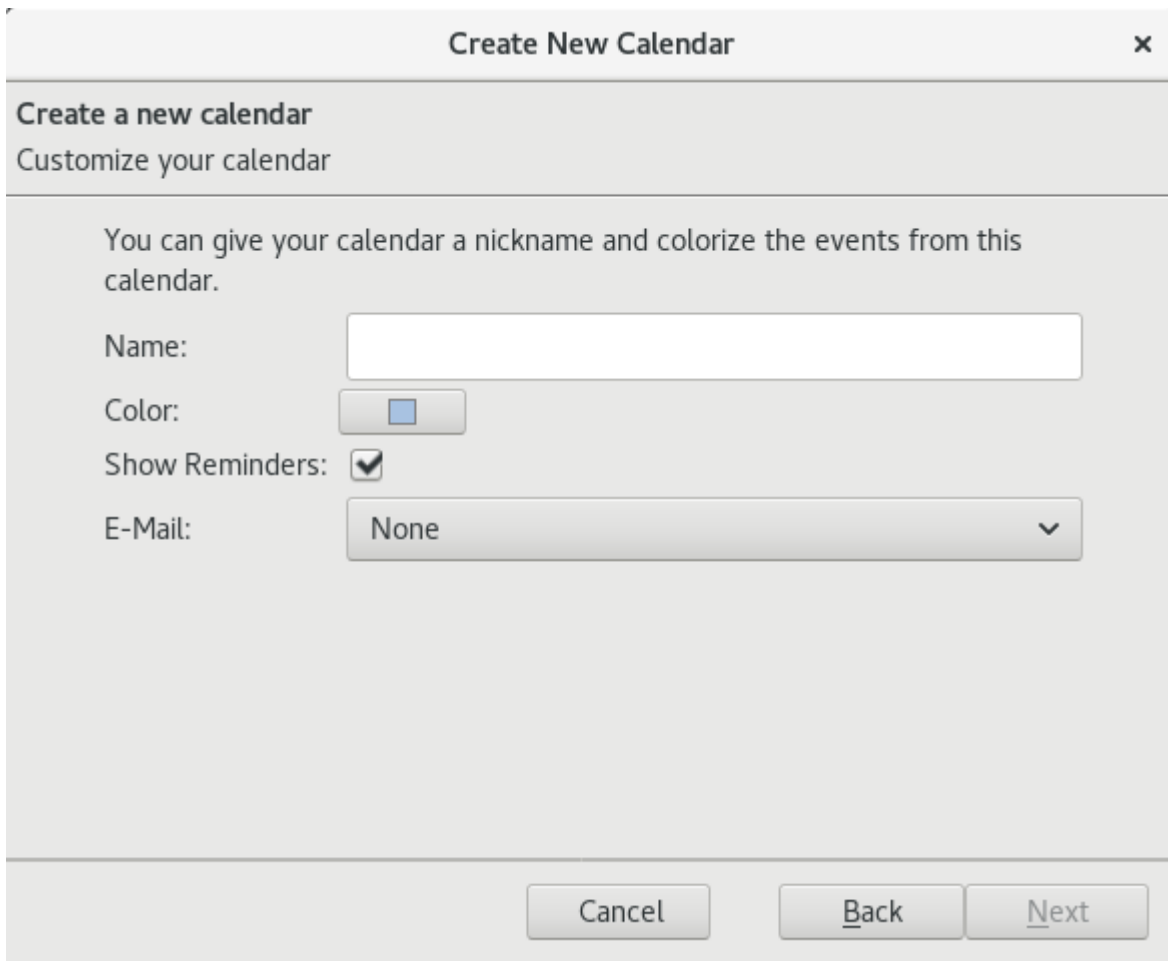

On the Network

Cancel Next

Fill the spaces:

Description	What to fill in	Notes
Format	CalDAV	
Location	<a href="https://138.232.65.244:1080/users/first.last@uibk.ac.at/calendar/NameOfYourCalendar/">https://138.232.65.244:1080/users/first.last@uibk.ac.at/calendar/NameOfYourCalendar/</a>	Make sure the calendar you're trying to add already exists, if not create one via the exchange webclient

Description	What to fill in	Notes
Name	Whatever you want to name your calendar	
Email	Which Email you want to link to this calendar	

Now click *Next* and finish the calendar setup.

## S/MIME

### Creating your Certificate

Visit the [DigiCert SSO Portal](#) and choose the University of Innsbruck

# IDP Selection

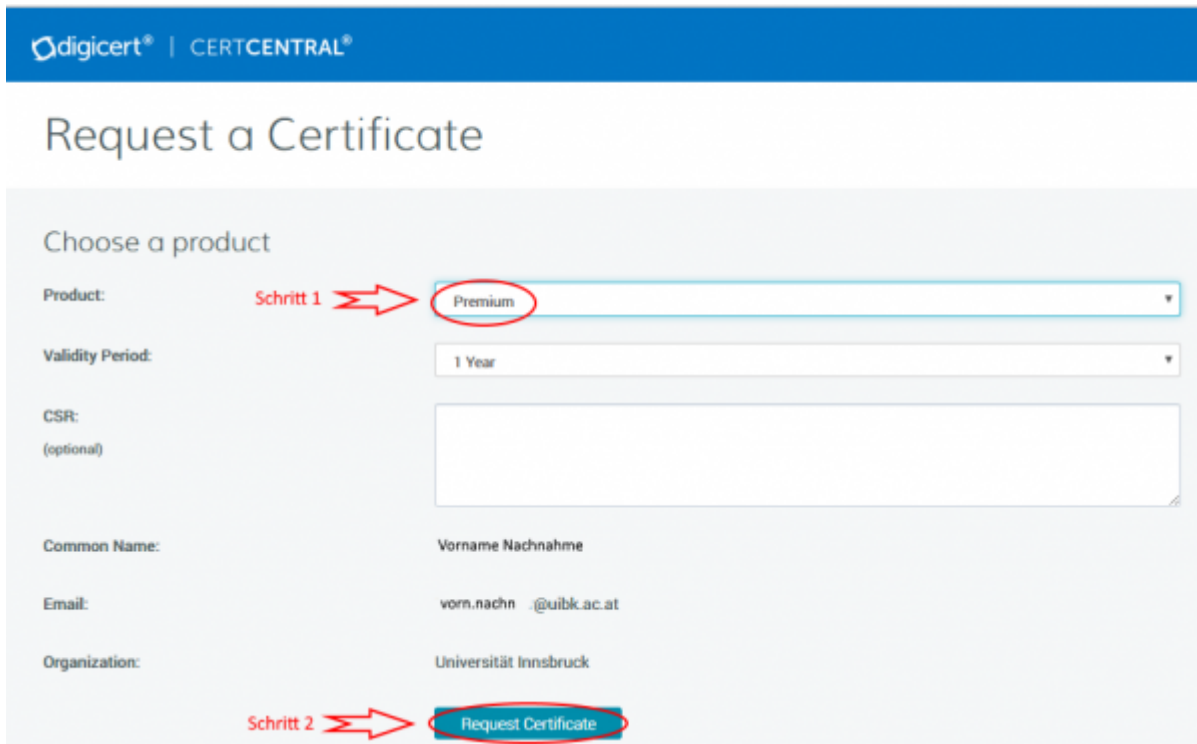

Please enter the Identity Provider to authenticate with:

**University of Innsbruck**

Next, login with your c-number

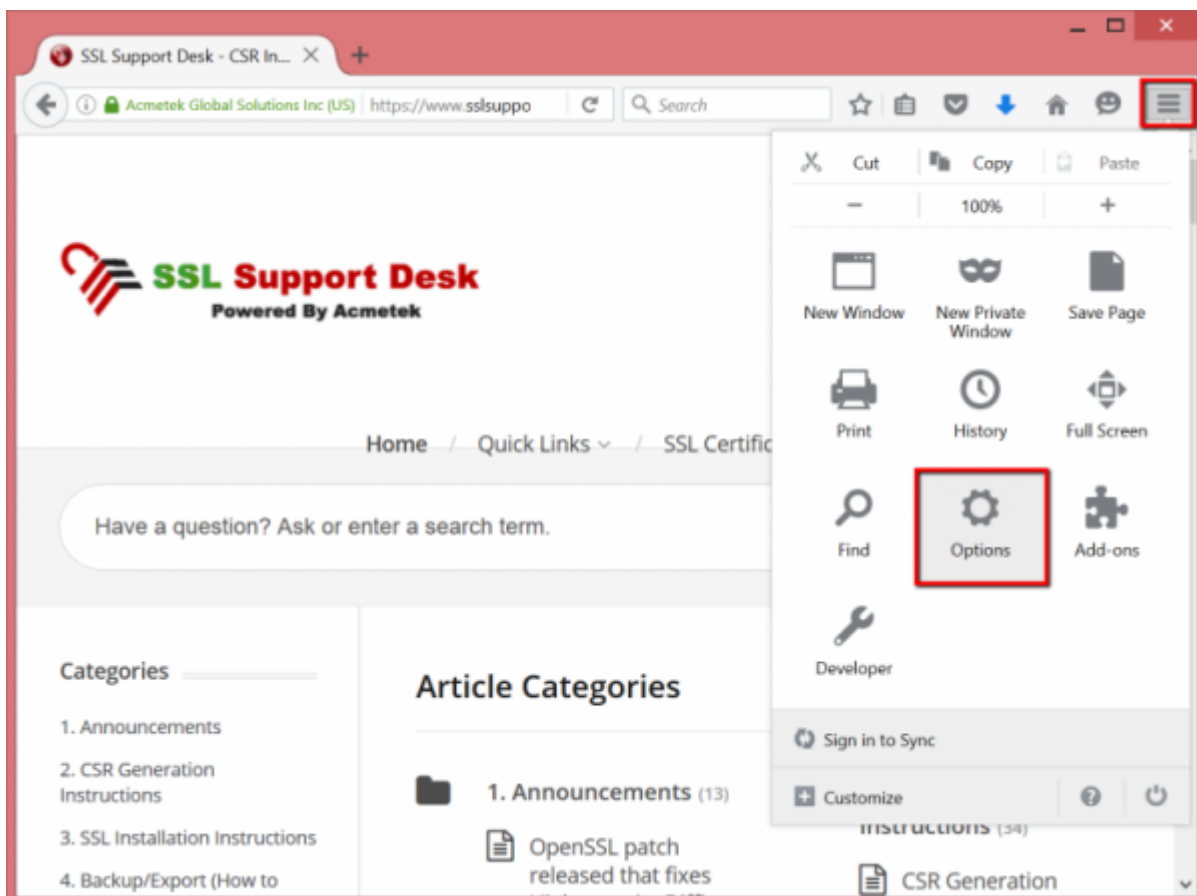

After that select **Premium** as Product, a Validity Period (1-3 Years) and click "Request Certificate"

## Exporting the Certificate (Firefox)

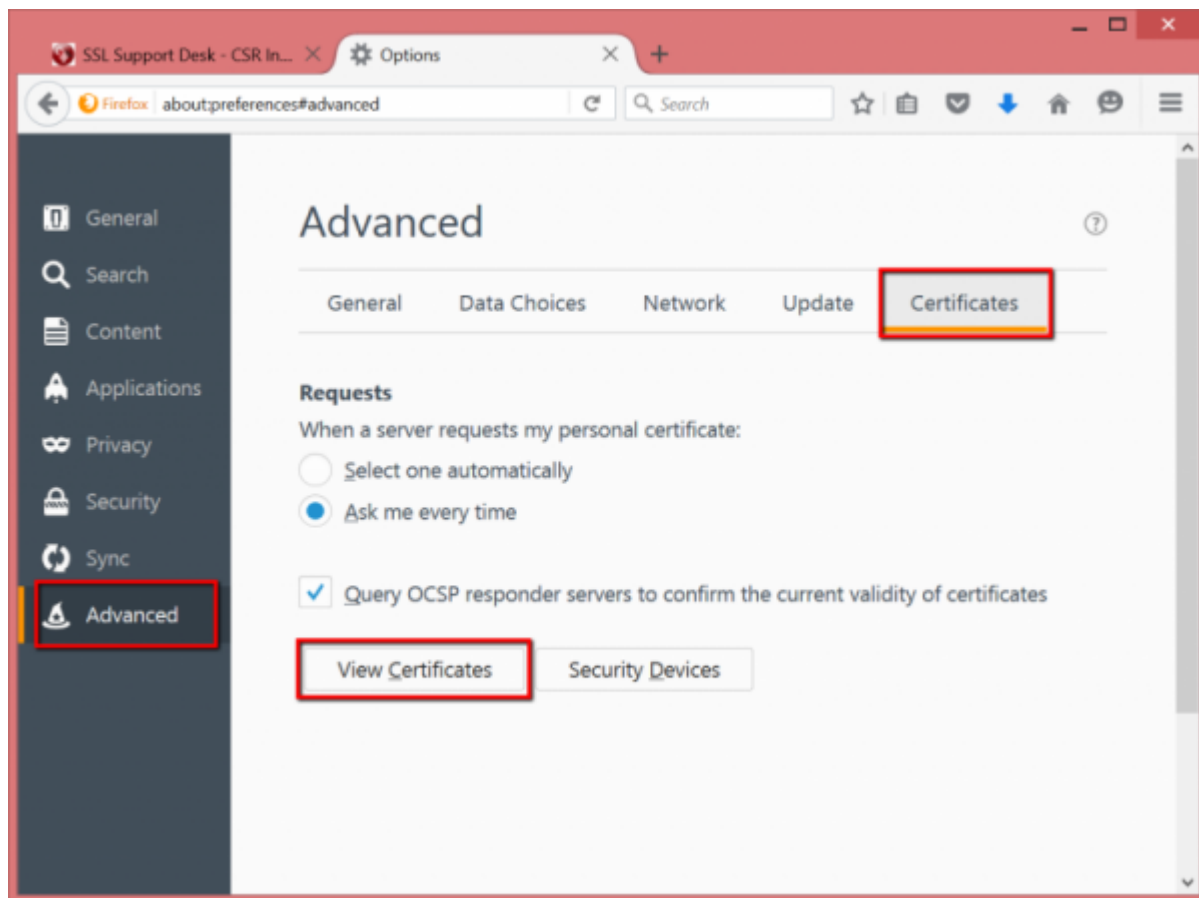

In the upper right of your Firefox browser click 

Click **Options**

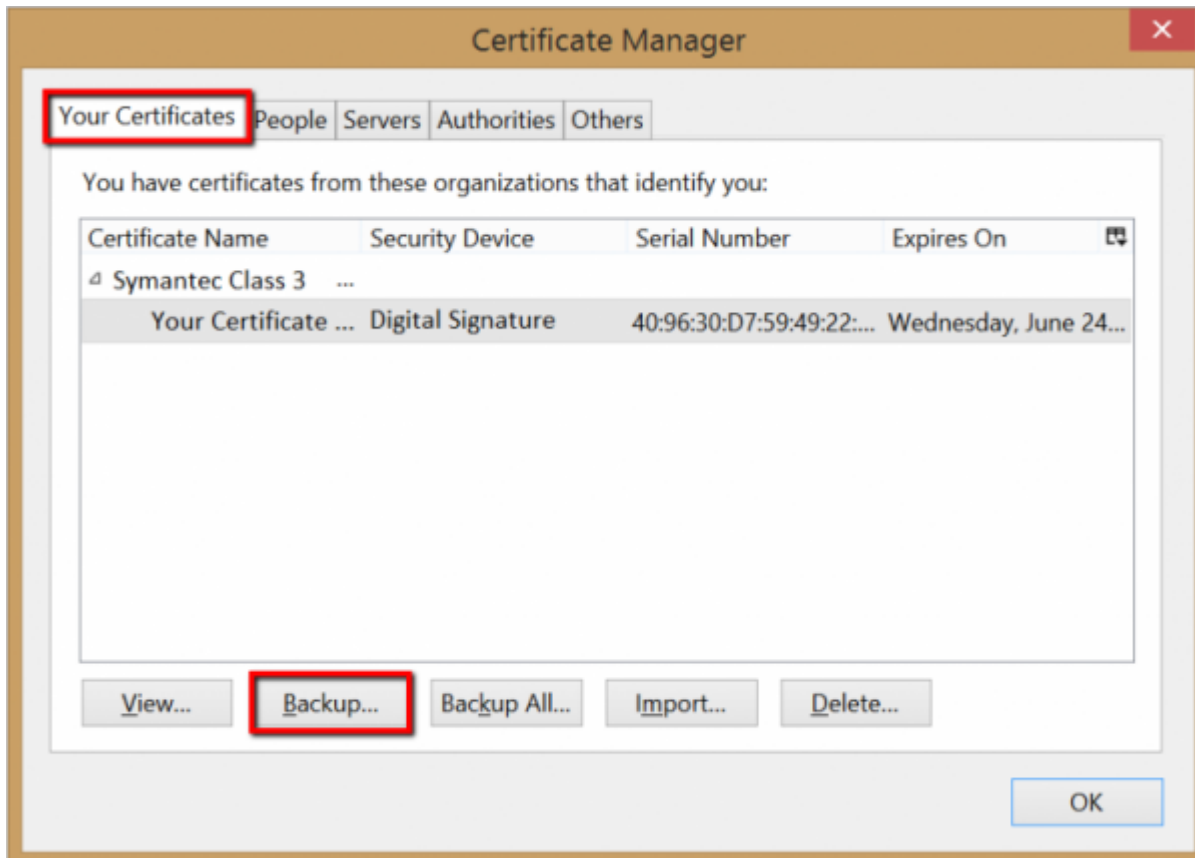

On the left panel click **Advanced**

Under Advanced click **Certificates > View Certificates**

In the Certificate Manager click the **Your Certificates** tab

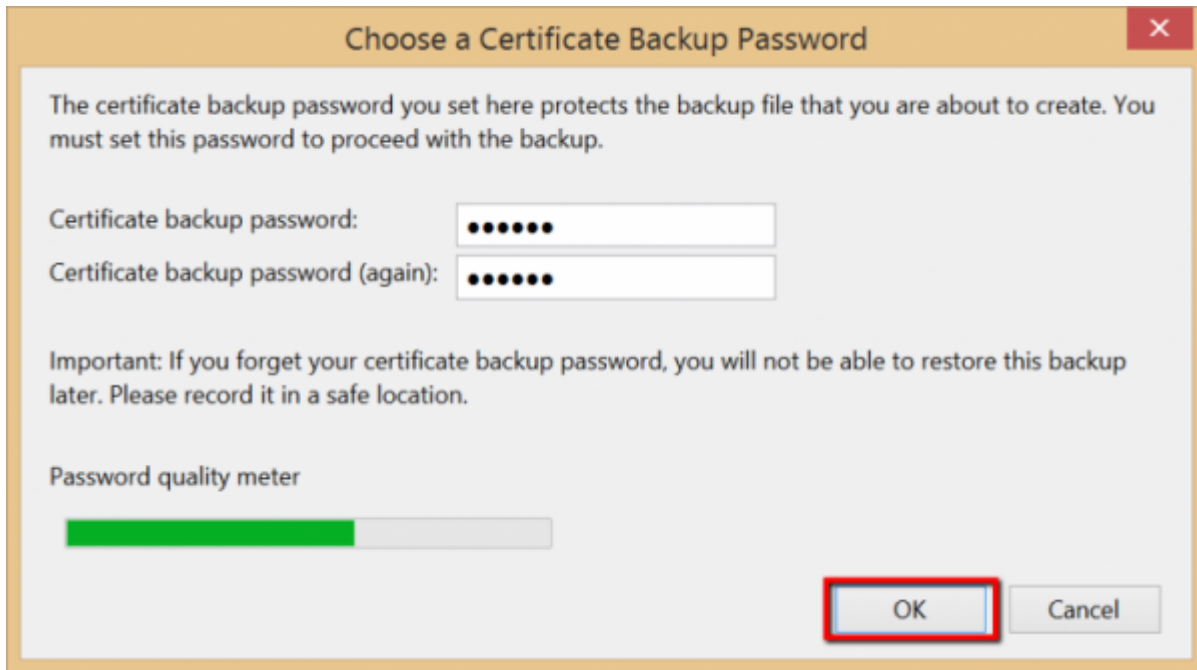

Select the Certificate you want to export and click **backup**

In the **File Name to Backup** window specify the location and name of your certificate .p12 file backup

In the **Choose a Certificate Backup Password** window specify a password for your certificate

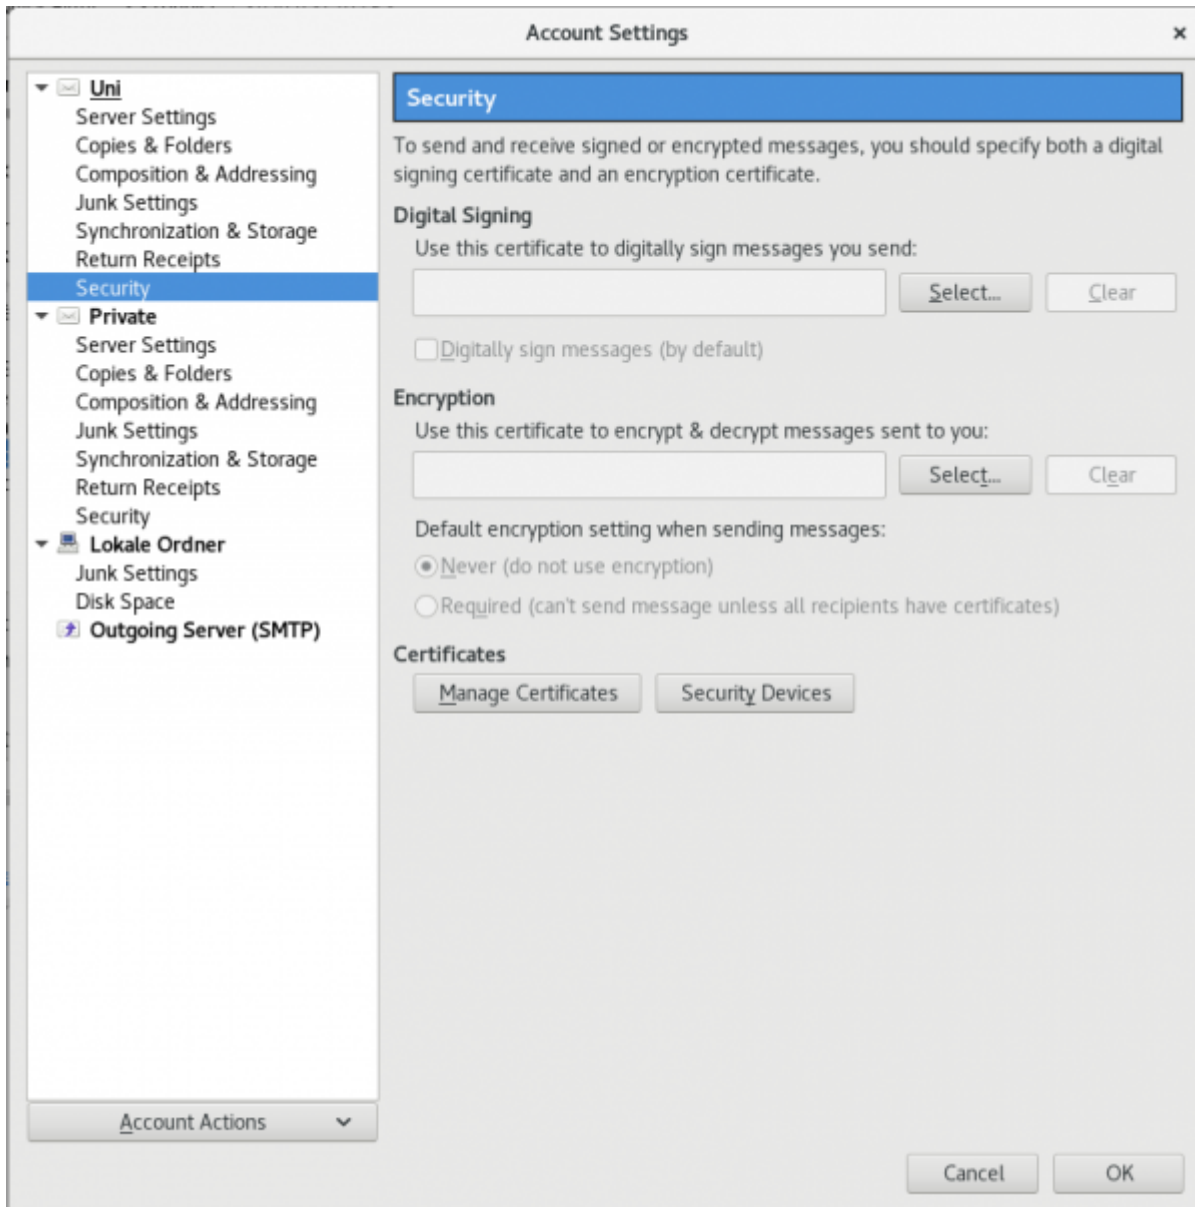

In the **Alert** window click **OK** and you're done

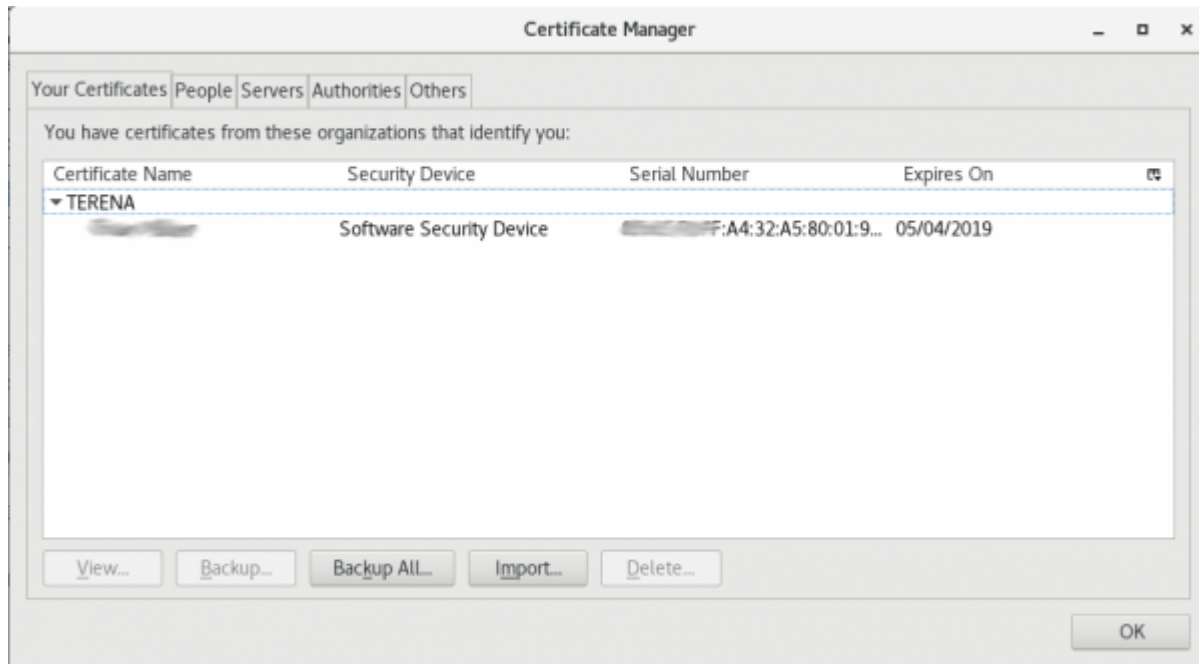

## Using your Certificate with Thunderbird

Open the **Account Settings** window in Thunderbird, select **Security** (for your University Account) and click **Manage Certificates**

In the **Certificate Manager** window make sure you've selected the "Your Certificates" tab and click **Import**

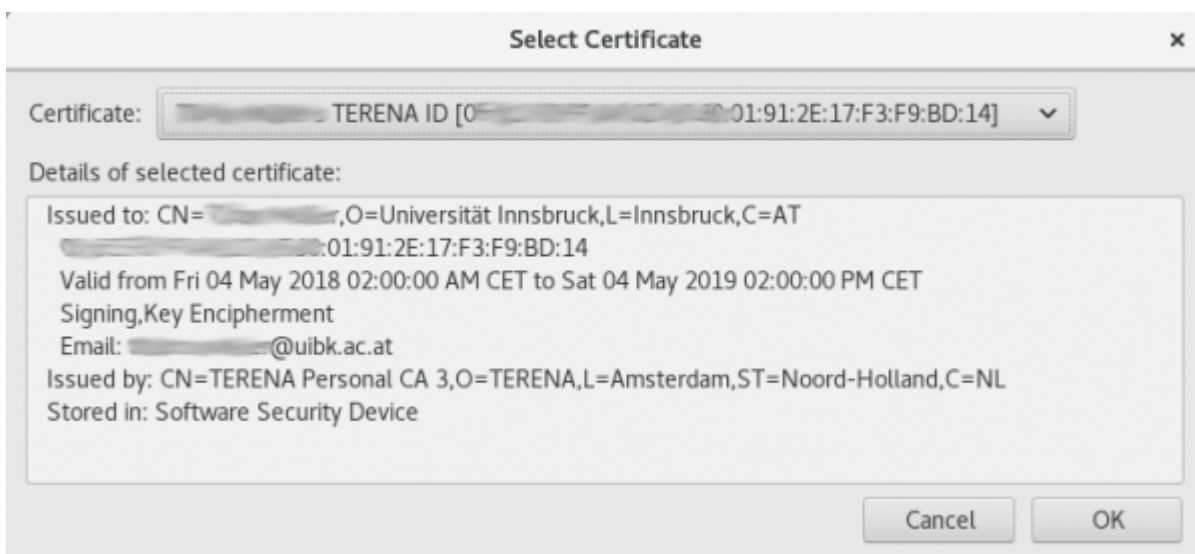

Select your previously exported .p12 file and enter your password

Back in the **Account Settings** window click **Select** next to the Digital Signing box

Select your imported Certificate

You're going to get asked if you want to use the same Certificate for Encryption, select **Yes**

And if you want to back in the **Account Settings** window you can set the check so that every mail

gets automatically signed

## openPGP

We suggest to use the **Enigmail** Thunderbird-Addon.
